Code White

PICU Physician

- Consultant to ED resuscitation team.
- Assists in duties, including confirming patient identification and code status, ensuring adequacy of chest compressions, interpreting EKGs, determining drug therapy and procedures.
- May provide or direct other pediatric critical care physicians to provide airway management.

Peds Anesthesiologist

- Responds to Code White and ED Code White activations (**Weekdays 8a-6p**).
- Consults and assists with airway management as needed for pediatric codes.

Adult Anesthesiologist

- Responds to ALL code activations.**
- Performs airway management for all adult codes.
- Consults/assists with airway management as needed for pediatric codes.
- In some circumstances, will assist with vascular access/advanced procedures.

Code Blue

ICU Attending

- Responsible Attending physician for code blue response (**Weekdays 8a-6p**).
- Collaborates with ED Attending for adult codes.
- Assists in duties, including confirming patient identification and code status, ensuring adequacy of chest compressions and ventilation, interpreting EKGs, determining drug therapy and procedures.

Adult Clinical Resource RN (RRT)

- Responds to all code blue events.
- For MB ED code blue activations, provides additional nursing resource as needed.

Adult Hospitalist

- Assists Code Team leader with interpretation of ECGs and decision making regarding appropriate drug therapy and procedures for adult codes.

Adult Critical Care NP

- Assists with airway management, medication administration, management of defibrillator, vascular access and CPR.

In the Mission Bay Emergency Department (MB ED), Codes will be activated by the Voalte system. In situations where the activation systems are down, the telephone system will be used by calling **4-1234**. When reporting the emergency, identify if it is a Code White (pediatric) or Code Blue (adult), building and room location.

The Pediatric Critical Airway Team (P-CART) is activated by calling Access Center 3-1611.
